

## Mountain Goat Survey Summary- Hunt Area 480, 2022

Kodiak National Wildlife Refuge

Joy Erlenbach

8/9/2022

USFWS staff (observers Joy Erlenbach and Ryan Mong; pilots Jordan Murdock and Brett Nigus) surveyed mountain goats in Hunt Area 480 over 8 days between July 20 and August 4, 2022. We flew 21.93 hours, and surveyed for 17.43 hours. We counted 1,509 total goats composed of 1,225 adults, 280 kids, and 3 unknown individuals with a kid:adult ratio of 0.23. All 25 survey subunits, and the “refugia” area along the Southwest coast were surveyed (figure 1).

The number of individuals observed this year was lower than 2020 but within the range variation seen in counts over the last 6 years’ surveys (1,471-1,950 total animals, 2017-2022; table 1).

A file with this summary, scanned datasheets, a csv file of entered data, animal location and survey track geodata, and a map have been provided.

Table 1. RG 480 survey summary 2017-2022.

| Year | Total Animals | Adults | Kids | Unknown | Kid:Adult ratio |
|------|---------------|--------|------|---------|-----------------|
| 2022 | 1,509         | 1,225  | 280  | 3       | 0.23            |
| 2020 | 1,702         | 1,332  | 369  | 2       | 0.27            |
| 2019 | 1,471         | 1,130  | 326  | 15      | 0.29            |
| 2017 | 1,950         | 1,544  | 406  |         | 0.26            |
